## Lions Club Sports Day Held Friday

The Carbon Lions Club third annual sports day was held Friday after a one-day postponement due to rain. Despite the postponement entries in the parade compared favorably with former years. Judges were Mrs. S. J. Garrett, Mrs. R. J. Shaw, Stewart Hay and Leslie Bramley, who made the following awards:

Best dressed girl, 6 and under: 1st, Lynn Bushby; 2nd, Susan Skerry; 3rd, Susan Hoivik. Best dressed boy, 6 and under: 1st, Gussie and Freddy Nash; 2nd, Carter Schacher.

Best dressed girl, 7 to 15: 1st, Geraldine Mortimer; 2nd, Betty Drexler; 3rd, Anderson sisters.

Best dressed boy, 7 to 15: 1st, Jerry Maiera and Archie Ohlhauser; 2nd, Michael Charlebois; 3rd, Dale Gimbel and Arthur Hoivik.

Best child comic, 1st, Mervin Diede.

Best child and pet: 1st, Larry Diede.

Best decorated tricycle: 1st, Lorraine Holmes; 2nd, Dianne Appleyard.

Best decorated bicycle: 1st, Frances Kaughman; 2nd, Harvey Harsch; 3rd, Helen Hoivik. Best horse and rider: 1st, tie, Mervin Permann and Dale Hector; 2nd, Morley Buyer.

Best old time outfit: 1st, Michael Charlebois.

Most original costume: 1st, Indian group, Gordon Simons, Albert Charlebois, Don Puchner, Freddy Hermanson, Karl Maiera, Aaron Drexler and Larry Hector.

Best decorated car: 1st, Carbon Wheat Club; 2nd, Shaw's Drug Store; 3rd, tie, Sam Garrett and Carbon Students' Union.

Best decorated float, 1st, Lions Club; 2nd, Renold Neher.

Teams from Acme, Carbon, Ghost Pine and Swalwell competed for \$125 in prize money in the baseball tournament and fans witnessed a good brand of ball through the day. Carbon won from Acme in the morning fixture by an 8-2 score while Swalwell trimmed Ghost Pine 12-4 in the second semi-final contest. Carbon displayed plenty of hitting power in the final to down Swalwell 12-4. Big gun in the Carbon attack was Howard Hunt, who pounded out a base-clearing home run and three bagger to drive in seven runs.

Midway attractions were well patronized and the merry-go-round was crowded to capacity with kiddies thronging in from opening to closing time. Children's races were also run off under the supervision of Bert Charlebois and Russell Snell. Swimming pool facilities were free to all.

Cliff Harvey's band played to a big crowd at the dance in the evening. Mrs. John Diede was the lucky winner in the midnight draw for the talking doll.

## Trade With Britain

THE RECENT ANNOUNCEMENT that British purchases in Canada in the next year are likely to increase by fifty per cent. has been welcomed here. The inability of Britain to buy widely outside of the sterling area since the war has caused a disruption of the long-standing trade relations between the two countries and the loss to Canada of a traditional and dependable market for our surpluses of grain and raw materials. Britain's effort to overcome the dollar shortage, which was one of the great problems left by the last war, have been watched with concern by many in this country.

### Welcome To British Also

Canadians have co-operated in the campaign put on by Britain to sell British goods in Canada, and the amount of goods sold here, notably British automobiles, has no doubt had a very important part in restoring British purchasing power in this country. While the falling off of British buying in Canada has caused concern and anxiety in many quarters, we should remember that the people of Britain have been severely restricted in the supply of many important items, and the flow of more wheat, newsprint and other Canadian products to their country will be as welcome to them as it is to us.

### Has Turned To United States

In the face of Britain's inability to buy from this country, Canada has turned to the rich export market in the United States in the past few years. However, any change in the American economy might result in a decrease in the amount of their imports from Canada. Great Britain, with its large population and limited living space has always been a dependable market for Canadian wheat and other food products and as her purchasing power in the dollar area grows, there will be general satisfaction that another of the great post-war problems is nearing solution.

## 13 Canadians Win Recognition For Heroism

### Western Boys And Girls Among Those Honored By Royal Canadian Humane Association

HAMILTON, Ont. — Martin Binkle rushed into a burning home and led 10 children and their aged grandfather to safety.

That was last Nov. 15. Today the Kitchener, Ont., man was one of 13 persons honored by the Royal Canadian Humane association for acts of heroism in 1950. All were awarded the association's parchment certificates.

Five boys and one girl were among those honored.

Two Indians, Gordon Jacobs, 14, Capilano Indian reserve, B.C., and Wilfrid Joseph Prosper, 23, Micmac Indian of Eskasoni, Cape Breton, N.S., were on the list.

Gordon received his award for the rescue of G. F. Moore, from drowning in Burrard Inlet, Capilano, B.C., Dec. 27. Prosper for the rescue of three small children from their burning home at Eskasoni, Cape Breton, N.S., on Nov. 22.

Youngest on the list was Richard Jackson, 12, East Famboro, Ont., who rescued Joan Simpson from drowning in a well on Oct. 29.

Others selected by the board of investigating governors of the association were:

Johann V. Arnason, Gimli, Man., for the rescue of Jerry Hykawy, from drowning in a culvert at Gimli, May 7.

William J. Graham, Sydney, N.S., for the attempted rescue of Stephen Melnick from a sewer sump, on July 11.

Eric Mauger, 17, Milner, B.C., for the rescue of W. E. Walkden, from drowning in Salmon River, Langley, B.C., Nov. 26.

Jack Cresswell, 15, Grantham's Landing, B.C., for the rescue of Wendell Hunter, from drowning at Grantham's Landing, March 29.

Alfreda Baniulis, 14, Oxbow, Sask., for the rescue of Herbert Hodgson, from drowning in the Souris river at Oxbow, July 6.

Colin A. Mackie, Toronto, for the rescue of Heather Irene Stokes, from drowning in Balsam Lake, Ont., July 16.

Samuel Wood, postmaster, Buckhorn, Ont., for the rescue of Bill Pearson, from drowning in Buckhorn Lake, Dec. 15.

Mrs. Fannie Powers, general Chegouge, N.S., for the attempted rescue of Harold L. Perry, from drowning, Tusket river, N.S., Nov. 2.

Harvey Collins, 16, Burin, Nfld., for the rescue of Judy Collins, from drowning in Ship Cove pond at Burin, Jan. 29, 1951.

### NUDISTS TO MEET

VANCOUVER.—Nudists from the northwestern states and all of Canada are expected here August 11-12 to attend the fifth annual convention of the Canadian Sunbathing Association on Vancouver's North Shore.

At least 200 men, women and children have indicated they will go to the mountainside camp of the local "Van Tans" nudist group for the meet.

## Funny and Otherwise

A woman, whose husband is in a business that requires his absence from home for a week or two several times a year, was asked if she missed him a great deal.

"No, not so much," she replied. "I just prop a newspaper up in front of his breakfast plate and imagine he is there behind it."

Lady Customer: "I see this medicine is advertised as good for man and beast."

Druggist: "Yes."

Customer: "Gimme a bottle. I believe it's the right combination to help my husband."

"How are you getting along in your driving?" inquired an interested friend of the novice.

"Oh, fine," she bragged. "Yesterday I went 50 miles an hour and tomorrow I'm going to try opening my eyes when I pass another car."

A distinguished visitor to an insane asylum went to the telephone and found difficulty in getting his connection. Exasperated, he shouted to the operator:

"Look here, girl, do you know who I am?"

"No," was the calm reply, "but I know where you are."

The conceited young man was even more boring than usual.

"It's a fact," he said with pride, "that people often take me for a member of the guards."

His pretty companion wasn't impressed. "Really?" she drawled. "Fire—shin—railway—mud—or black?"

Dad labored hard for eighteen years To keep the wolf away; Then daughter up and married one And brought him home to stay.

It was during a lover's quarrel that she said, "If I said anything I'm sorry for, I'm glad of it."

Father: "What is the time?" Engaged Daughter: "Alfred's watch is not going."

Father: "And what about Alfred himself?"

"Parents," growled the aged bachelor, "most contrary folk in the world. Spend months teaching their child to speak, then do nothing but tell it to 'be quiet!'"

### PEGGY

## Sloughs Good Spots For Feed

Sloughs should be plowed up and seeded to cultivate grasses as soon as they are dry enough to be worked satisfactorily, the Swift Current Dominion experimental station said.

These areas, the report said, could produce large amounts of high quality feed if they were cultivated and seeded before they became too dry and hard.

The important task is to see that all native vegetation is destroyed and a good seed bed is prepared.

The best implement for the job is the moldboard plow although other machines including a one-way may sometimes be used with satisfaction.

In some cases it may be possible to seed early enough for a late crop of oats and then seed the grass in the stubble in the fall.

Late fall seeding of grasses is to be preferred to midsummer or early fall seeding.

Reed canary grass has been recommended for the sloughs likely to be covered with water for several

## Prairies Receive Nearly \$25 Million Defence Contracts

OTTAWA.—Millions of dollars are being spent in the prairies on defence contracts and under the air training plan as Canada's defence programme increases Rt. Hon. C. D. Howe, minister of defence production, told parliament.

In the past fiscal year the prairies received defence contracts amounting to nearly \$25,000,000 he said.

In Saskatchewan alone, in April, defence orders worth nearly \$500,000 were placed. In May Defence Construction limited (a crown company) awarded contracts for over \$4,000,000 in that province, said Mr. Howe.

He was replying to complaints which he said were voiced frequently from the prairies and in particular Saskatchewan, that too few defence contracts were awarded in the west.

Recommended grasses where less flooding occurs are brome and slender wheat grass.

A seeding rate of four pounds per acre is considered sufficient for a good stand of grass.

The giant redwoods and other coniferous trees are evolutionally less advanced than the humble dandelions and sweetpeas.

Britain has the highest proportion of book readers according to population.

## Food Tastes So Much Better

WITH

## Blue Bonnet MARGARINE

And costs so much less to prepare!

Of course you know how delicious Blue Bonnet is as a spread for bread or toast. Fresh! Delicious! Country sweet! Why not enjoy this extra goodness in all your cooking, too?

Pan fried foods are beautifully browned, crispy, and flavorful — every time!

Perfect seasoning for vegetables just as delicious when melting-hot, as when fresh from refrigerator!

Light, tender cakes are yours every time with Blue Bonnet! Perfect for the icing, too.

Sauces for fish and vegetables turn out so smooth, taste so delicious — and cost so little to prepare!

All your pastry is made feather-light and flaky so much more easily with Blue Bonnet Margarine!

## Only Blue Bonnet Margarine comes packaged 2 convenient ways!

1. In the economical regular-type package with convenient color water in every box!
2. In the exclusive new Blue Bonnet Yellow Quik bag! Just press the color button... knead the bag... and delicious Blue Bonnet is colored ready to use in 2 minutes flat! No messy mixing! No dishes to wash! No waste! Ask your grocer for Blue Bonnet Margarine in whichever package you prefer.

# A LOT OF COFFEE IN BRAZIL

Yes, But Not Enough To Answer Demand

By RAYMOND A. LAJOIE  
(CPC Correspondent)

More and more during recent months, people have looked up from their morning cup of coffee to mention something like this:

"I see coffee went up another cent this week. How do they get off boosting their prices all the time?"

The answer is a matter of economics—a story of supply and demand. Presented in its simplest terms, coffee production is lagging at the same time that consumer demand is growing. That is why prices have gone up.

Coffee crops have been smaller than ever before the past five years. Droughts have held back the growing of coffee trees in Brazil and other countries, while at other periods too much rain during harvesting and drying seasons has ruined much of crops.

A severe frost in 1943 devastated great quantities of coffee — flowers and berries. Cold winds have added to the problem and have kept trees from flowering at their finest. Making matters worse, many trees were destroyed because business was unprofitable.

That's not all! The villainous broca, an insect native of Africa, unfortunately found its way into Brazil. Eating along inside the coffee berry, the broca has ruined huge amounts. All of these factors have combined to cut world production of the popular bean by 5,000,000 bags in 10 years.

Labor costs also have held down production. Some instances have even forced abandonment of plantations. In the last three years, cost of labor

in Brazil, producer of 60 per cent. of the world's coffee, has increased sharply on a scale comparable to the same existing in Canada.

Many plantation workers have been lured to cities by attractive higher wages and better living standards, simultaneously creating a severe shortage of specialized coffee help. Those who stay on at plantations ask for and usually get more pay and improved living conditions in line with city cousins.

While production has been dropping, people have been clamoring for more and more of it. The North American consumption 10 years ago was 14,800,000 bags. Today it's nearly double that amount.

However, the larger part of the heavier demand is a per capita increase. Each of us is drinking more coffee than we used to.

Back in the early 1930s, far more coffee was produced than was consumed. Many recall how millions of pounds were destroyed. Today, with production falling short and people wanting more coffee than ever before, supply and demand are nearly in balance for the first time. For how long this will last, no one can say.

During this crop year, more coffee was absorbed than was placed on the market, and the difference — about 4,000,000 bags had to be taken from existing rotating stocks in ware houses. Now, reserves are nearly depleted.

Coffee men had hoped for a good crop last autumn but once again, Nature's drought interfered to keep a good-sized harvest from materializing.

Markets usually anticipate events at least six months ahead and al-

though no actual shortage exists at the moment, a statistical decrease may show later. This is why the market has advanced and may continue to do so slightly.

Even with disappearance of reserves there is good reason to believe that world coffee production will increase to about 30 per cent. by 1960.

Thousands of trees were planted in Brazil during 1946 and will soon begin to yield for they usually produce about the seventh year. These plantings, along with boosted production in the "mild" coffee areas such as Colombia, Central America, Mexico and Africa should help to keep supply and demand in close balance for about 10 years, assuming, of course, that the broca bug is kept under control.

Unless the dollar's value drops for our entire economy, authorities believe coffee prices will remain somewhere on present levels. To many these appear high and they are right.

Coffee prices have risen sharply since pre-war days. Colombian beans delivered in New York or Halifax were 15 cents a pound that year. Today it's triple the amount.

Brazilian beans cost 12 cents a pound back in 1941 while now they are nearly 50 cents. However, during the same period where coffee's price has zoomed, the prices of other commodities have also tripled or quadrupled.

With all our new-found knowledge experts still cannot guarantee the situation for this or next year. It seems Nature has the final word after all!

Miles and miles and miles of coffee plants. But still there's a world shortage. —Central Press Canadian.

## SIMILARITIES HELP MARRIAGES STICK

LOS ANGELES.—Opposites may attract, but a nationally famous marriage counsellor asserts that "similarities between husband and wife have a lot to do with making marriages stick." The marriage expert, Paul Popenoe, head of the Institute of Family Relations of Los Angeles, says: "Couples prosper who have the greatest degree of similarity in almost every possible way: race, religion, culture, education, family background, ideals and even habits of daily life."

Little Jane Primm has lost her vim, And simply cannot regain it, Lurching on liver and good foods will give her New energy — and she'll retain it.

Dept. of National Health and Welfare

## Man. Motorists May Use Signalling Devices Without Trouble

WINNIPEG.—Motorists using signalling devices on their cars won't get into trouble in Manitoba as long as the device is of an accepted type that is easily recognized.

Local safety officials sprang to the defence of electrically operated turn-

ing indicators when asked to comment on a Vancouver case where a man chose jail rather than pay a \$5 fine for using a flashing light indicator instead of a hand signal.

Such a fine could not result here, officials said, as the highway traffic act provides only that a motorist take reasonable precautions before making a turn and should indicate the turn by an audible or visible means.

## STILL TRYING TO SHOOT HIS WAY IN!

—Werner in The Indianapolis News.

## Scientists Seek Why Potatoes Turn Black

OTTAWA.—Government scientists turned cooks to see what makes the lowly spud turn black when it's cooked.

The scientists prepared to boil several hundred samples of Canadian-grown potatoes under a variety of conditions at Central Experimental Farm kitchens. They hoped the experiments would at least give them a clue to the mystery of the black boiled potatoes.

The problem of unappetizing, discolored spuds was referred some time ago to N. M. Parks, associate horticulturist and potato specialist at the Experimental Farm. Special studies have been started by the Canadian Horticultural Council, the Fertilizer Advisory Board for Ontario, and other provincial agencies.

The discoloration of Canadian potatoes is a serious matter to growers because it affects both domestic and export sales.

During the past few months Parks and his staff have been collecting potatoes grown in Eastern Canada for their cooking experiments. The spuds were collected in Montreal, Toronto and Ottawa, and include samples of all varieties grown in the Maritimes, Quebec and Ontario.

The collecting job was spread over several months, and was expected to be completed soon. Altogether Parks and his aides have about 600 samples.

Parks said the mystery of black boiled potatoes has puzzled scientists for many years. It is an involved and complex matter, he said, and it is generally agreed that no single factor is responsible for the blackening.

"We're not too clear about the reasons," he said. "However, we hope to get at the bottom of the problem by scientifically cooking the potatoes we have collected. It will be some time before the results of our experiments are available."

The mass cooking project was only part of the experiments into the reason potatoes reach the table with a dark look. Parks said factors believed to enter into the picture included temperature, fertilizers, soil, variety, and chemical factors in the lowly spud's makeup.

## GEMS OF THOUGHT

### LIBERTY

He that would make his own liberty secure must guard even his enemy from oppression.—Thomas Paine.

There are two freedoms—the false, where a man is free to do what he likes; the true, where a man is free to do what he ought.—Kingsley.

Liberty means responsibility. That is why most men dread it.—Bernard Shaw.

The love of liberty is the love of others; the love of power is the love of ourselves.—William Hazlitt.

Now the Lord is that Spirit: and where the Spirit of the Lord is, there is liberty.—II Corinthians.

## HEALTH

### PARENTAL AXE MUST FALL ON TOOTH-DESTROYING DIETS

There are two kinds of diet, so far as teeth are concerned—the formative and the destructive. According to Dr. E. R. W. Bilkey, writing in Health magazine, the destructive category is the one into which all candies and other sweet treats must fall.

The Toronto authority on pedodontics explained it this way: "Sugary substances when acted upon by certain bacteria in the mouth, cause the saliva in the localized areas around the teeth to become much more acidic in nature. Acid in turn can, and does, cause a breakdown of the enamel outer wall of the tooth. In this greatly weakened condition the teeth are easy prey to dental decay; and hence in many mouths thus abused a great many cavities can usually be found."

Mouth cleanliness, too, plays a major role in preventive dental health, says Dr. Bilkey. Many of the foods which we eat, of necessity contain free sugars as well as starches. Thus a thorough tooth brushing and mouth rinsing as soon as possible after eating anything will help to eliminate danger from residual food substances.

In addition to dietary control and thorough cleansing, the Health League magazine urges early dental supervision for children, starting at the age of two and a half or three years, and "complete revision of our appreciation of the importance of the primary teeth, attaching at least the same importance, and preferably more, to these teeth than we do to our own."

In this hand from a duplicate pairs contest, the best North-South pair made good use of bids in shaded suits and avoided the pitfalls of Three No-Trumps, which was bid at most of the other tables. The only makeable game contract was reached after the following cautious approach: One Club—One Diamond; One Heart—One Spade; Three Spades—Four Spades. At some tables the defence started off with three rounds of Spades, but the fourth trump in dummy and his own hand gave South his ninth and tenth tricks. Three No-Trumps invariably failed for the ninth trick had to be developed in Spades and this gave East-West time to establish the setting trick in Diamonds or Hearts.

Although it never gets too cold to snow, it sometimes gets too cold to snow in flakes.

## On The Side : By E. V. Durling

There should be at least one rear view mirror in every house. Too many women who look marvellous from the front view present a horrible appearance in the rear. Take the wrinkled skirt angle. From a front view a woman looks smart and slick. From the rear she looks as if she slept in the park. Why doesn't somebody invent a gadget that will enable the wrinkle to be taken out of a woman's skirt after a period of sitting down. It could be used by powder-room attendants. This comment may increase the number of women who want to slap my face. However, it is at times necessary to be cruel to be kind.

### Mother Was Right

What became of molasses? When I was a lad a big afternoon treat was a piece of bread covered with molasses. Not so long ago I was much interested in reading that molasses has more health-giving properties for kids than spinach. So I guess the old-fashioned mothers knew what they were doing when they gave their offspring that afternoon treat of bread and molasses.

### Recognize The Winner

Now I have heard of another dog who is an accomplished horse picker. This remarkable animal, a Pekingese, is named Black Knight and is owned by Sir Alfred Munnings of London. Black Knight is taken to the paddock in a bag which has a window in it. He watches the horses pass by and when he sees the one he fancies he barks. That's his pick. Black Knight selects a lot of winners. The proof of it is that he has a special account with a bookmaker which shows him to be far ahead on the season so far.

### Advice From Dr. Summerskill

A very interesting Englishwoman is Dr. Edith Summerskill, M.P. Dr. Summerskill, now 50 years old, has been a wife for 25 years, a mother for 23 years and a member of parliament for 13 years. Some of her pointed observations are:

"The sensible woman can find life interesting at 40, exciting at 50, enthralling at 60 and stimulating at 70. But only if she cultivates her mind."

"If sometimes you want to kick your husband in the pants wait until the children have gone to bed."

"Big kitchens depress me."

"The chronically mean husband is a greater source of irritation to a wife than one guilty of one act of unfaithfulness."

### Tall Girls Get Their Men

As I have repeatedly stated, height is no handicap to a girl with talent. Louise Stranzinger, one of Europe's most popular night club singers, is six feet tall in her stocking feet. Louise is a green-eyed blonde with an extremely shapely figure. She has such terrific male appeal she has been nicknamed "The Threat".

Brooklyn Butchers  
Cut Cards Instead  
Of Meat

# World News In Pictures

School Teacher  
First Woman  
On Bisley Team

★ ★ ★ ★

★ ★ ★ ★

★ ★ ★ ★

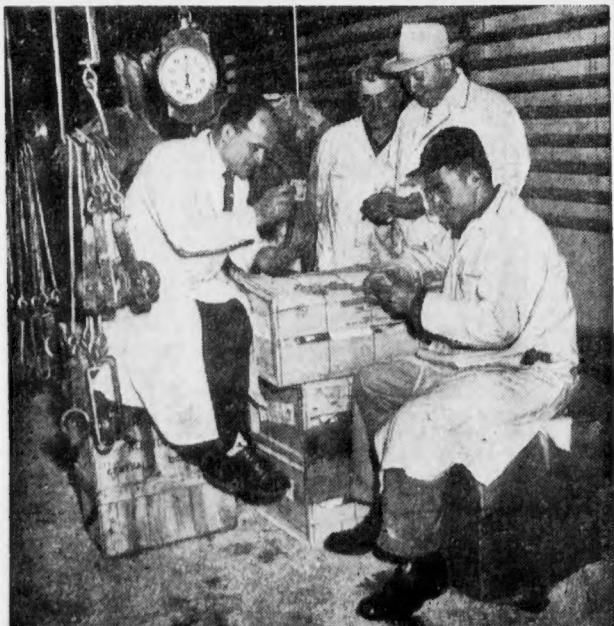

★ ★ ★ ★

**ON WAY TO NEW HOME**—Still a long way from his new home, Per-Olaf Back, 18 months old, rests in the arms of stewardess Viveka Themne of Stockholm, Sweden, at Montreal Airport recently as he paused in his journey from Finland to his new home in Vancouver. Per-Olaf was one of 46 Finnish immigrants aboard a Scandinavian Airlines System aircraft. This is the first time Finnish immigrants have flown to this country.

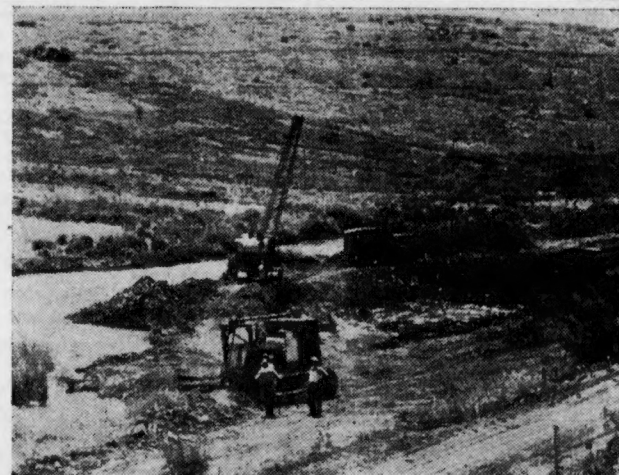

**MODERN ANNIE OAKLEY**—First woman to qualify for a place on the Canadian Bisley team, Lieut. Mary W. MacLennan is shown above. "This is the happiest moment of my life," bright-eyed sharpshooting Miss Mary MacLennan, Charlottetown school teacher, said on arrival in Montreal to take her place with the Canadian Bisley team, which left for England June 13th. First Canadian woman to achieve the ambition of representing Canada in the most famous of all international rifle shooting events, Miss MacLennan qualified for her place by placing tenth in the Bisley aggregate at the annual meeting of the Dominion of Canada Rifle Association last year. There are 17 other shooting members on the team.

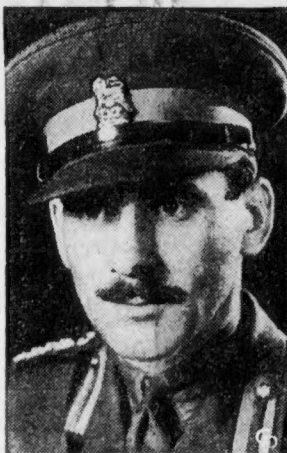

**NO MEAT, SO BUTCHERS CUT CARDS**—These Brooklyn butchers in Brooklyn, N.Y., would rather be cutting steaks than cards. But, as the U.S. beef shortage continues to spread from the western stockyards to the butcher shops, they suddenly find themselves with nothing to sell. In an effort to beat the price freeze on domestic beef, U.S. meat packers are importing large quantities of Canadian meat.—Central Press Canadian.

**MISSING AND CHARGED WITH ABDUCTING** her four-year-old son, Mrs. Rose Brousseau is pictured above. The boy, Jean, is shown as he appeared just before he was taken from his Terrebonne home. The woman's estranged husband, Serge Brousseau, 45, appears in a photo taken when the boy was a few months old. Police in Montreal, Paris and New York were alerted when the boy was reported missing.

**SWAMP DRAINING PERILOUS PROJECT**—Draining of the Huleh swamps on the Israeli-Syrian border has been authorized by the United Nations, but the men working on the canals still are targets for snipers' bullets. The draining, undertaken by the Israeli government to provide more land for tillage, has been bitterly opposed by the Syrians. Above, the swamp itself, in the process of having canals dug, appears hardly worth a loss of life. The tractor driver, (left), has an armored cabin to protect him from Syrian bullets as he moves earth for the canals.—Central Press Canadian.

—Central Press Canadian.

**SIMONDS TO MEET WITH TOP BRASS**—Canada's chief of the general staff, Lt.-Gen. Guy Simonds, (above), has departed for Washington, London and Europe, to discuss the integration of Canada's 27 army brigade into the Western European defence network. Gen. Simonds will also meet with Atlantic pact military chiefs, including Gen. Eisenhower, to deal with the important question of standardization of arms.

—Central Press Canadian.

**SUPPLIES DROPPED WHERE NEEDED MOST**—United Nations troops cluster about their tanks and trucks in a Korean valley as supplies and ammunition are delivered by parachute from flying boxcars to insure continuation of the drive against Communist forces. United Nations troops have captured the twin fortress towns of Chorwon and Kumhwa, anchor cities of the Communist "iron triangle" and the Reds were reported pulling out of that hotly-disputed area, leaving piles of equipment behind.

**SAME ACTIVITIES, DIFFERENT COUNTRY**—Exiled ex-vice lord of the U.S. underworld, "Lucky" Luciano has been accused by Italian police of smuggling \$57,000 and U.S. automobile into Italy. Deported from the U.S. to Italy in 1946, Italian authorities have long suspected him of dealing in narcotics but have been unable to catch him "red-handed". Luciano must pay five times the amount of the currency smuggled and value of the car, or serve a prison term.—Central Press Canadian.

—Central Press Canadian.

**KOREAN INNOCENTS EDUCATED IN CRIME**—Rounded up by unscrupulous adults and mobilized into gangs, hundreds of Korean waifs are being taught the art of stealing and methods of disposing of the stolen goods in the black market. Here, near Seoul's east gate, a woman "black-eteer" operates a stall while two lads, believed to be operators, look on.

## Achievement Day

W. S. Backman

Baby beef holds the spotlight at the Drumheller Junior Calf Show today. The boys and girls who fed and cared for them during the past eight months lead them in, but the judges, auctioneer and buyers will pay most attention to the beef. Junior Calf Club members have a very important part at the show. They must lead and show the animal to its very best advantage. Showmanship is usually recognized by a special award.

Important as the animals are on achievement day, they represent something far more important. The animal, on show day, reflects a passing phase only in

### CARD OF THANKS

I wish to thank my friends for their kind visits while I was in hospital, and a special thank you to the Carbon Old Timers' Association for the flowers.

Alf Holvik

### CARD OF THANKS

I wish to extend my sincere thanks to my many friends for cards, flowers and visits during my stay in hospital.

Doreen Hay

### CARBON BAPTIST CHURCH

Sunday, July 1

Sunday School at 10 a.m.

A special program will be presented Sunday morning by the Glory Gospel Trio of the Christian Training Institute at Edmonton. The trio consists of Miss Ardath Schmierer, Miss Estella Schell and Miss Agnes Fauser. The group was graciously received at all churches in their recent tour of the United States.

Following the program a group of new members will be received and communion will be served. A special Benke Memorial Chapel Building offering will be received after the communion. The chapel is being built as a memorial to the late Rev. Fred Benke, who began missionary work among the Indians some 15 years ago.

### ZION BAPTIST CHURCH

Sunday School at 10 a.m. One of the brethren will preach the service. Evening service and communion at 7:30. A special offering will be taken for the Benke Memorial Chapel building fund.

the life of the boy or girl. The selection of the young calf, is training in ability to make decisions. The care and attention in feeding and preparing the animals for show indicates the pride each member takes in achievement. Success at the show will be a start to greater achievement in bigger undertakings.

Nearly 1,800 boys and girls, members of Alberta's Junior Beef Calf Clubs, will parade with their calves before the judges this month at 23 of these shows. There are 90 clubs in Alberta. Eight of them take part at Drumheller. One hundred and eight calves will be sold. At present day prices, with the championship calf selling at 62 cents per pound, and the average price 32 cents, this amounts to considerable money. It is small value in comparison to the value in character training that the members have received.

In addition to the experience gained in care and feeding of the calves, club members attend meetings and rallies during the year. They hold judging competitions, receive instruction in breeding, and breeds. It is citizenship training on the farm. At Rockville farm last month I had the pleasure of seeing one club in competition under the direction of P.J. Rock, a well known stockman and seed grower. In July or early August there will be a grand rally of all Junior Farm Clubs, including Grain Clubs and Home Maker Clubs at the same place. The Swalwell Club was given the same excellent instruction by J.H. Barkley on his farm and at the Curling Rink in Swalwell where meetings were conducted. The Yellowlees farm west of Acme was a beautiful setting for the Avondale and Swalwell Calf Club picnic, judging and instruction under Mr. McPhail, District Agriculturist at Olds. Many parents and friends enjoyed the fine hospitality provided by the Yellowlees. Beef Clubs will visit three outstanding cattle ranches in Southern Alberta on June 16th. This is by far the most important part of Junior Club training.

Many agencies encourage Junior Club training. Special awards in the form of shields, cups, show halters are donated to encourage good work. Competition

in Provincial trials at Olds School of Agriculture offers an opportunity to meet a wider circle of members. Those who win at Olds will go to the Toronto Royal for Dominion honors. Some lucky members will attend Farm Young People's Week at the University in June. Encouragement of this kind adds interest in Junior Club membership.

Youth training, whether on the farm, in the city, town, village or hamlet is of very great importance to young people. Their homes and community are influenced by the activities of these clubs. The agencies that encourage Junior Club activities and the individuals who give time in leadership and training know that the boys and girls are of paramount importance.

## Calfhood Vaccination Urged in Municipality

Cattlemen with herds free from Bangs Disease should be taking active steps to prevent loss of calf crops this year. Calfhood vaccination is urged between four and eight months of age. Those who have calves

this age are urged to contact the Field Supervisor as soon as possible. The Veterinarian has agreed to do them in small groups, provided the calves are in and ready when he arrives. It is to your own advantage to report all cases of abortion in cattle. It may be due to the feed you are using.

## Fattening Heifers In Six Months

VANCOUVER, B.C. — Twenty-four head of prime cattle tip the scales daily as University of British Columbia agriculture scientists try to trim six months off the time required to get heifers ready for market.

The scientists are experimenting with a new feed developed from grain elevator waste and a liquid by-product of the province's whaling industry. First tests showed a small ration of the new feed kept steers growing throughout the winter.

Dr. A. N. Wood, U.B.C. animal nutrition expert, said use of the new feed may get animals ready for market in 18 instead of the usual 24 months.

Four test groups of six steers each received different rations at Col. Victor Spencer's Earls Court farm at Lytton, B.C. The first group got only hay and water and gained one-third pound per day.

The second group was fed a pound of the new feed a day, plus hay, and gained a little less than a pound a day.

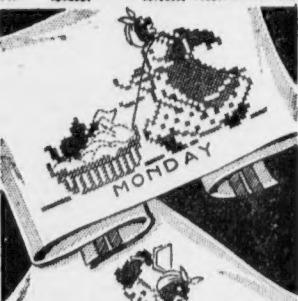

The third group received two pounds of the new feed, plus hay, and gained exactly one pound per day, Wood said. The fourth group was given three pounds of feed, and hay, and put on more than a pound of weight per day.

Wood said a test run of heifers were getting eight to nine pounds of the new feed daily, and it was hoped they would reach a weight of 900 to 1,000 pounds by August or September.

Wood said the new feed is a combination of No. 4 screenings from grain elevator waste plus "whale solubles"—a by-product of the whaling industry.

## Patterns

One For Each Day

C7113

Alice Brooks

It's fun to do dishes when you are using these towels! Motifs are embroidery—fun too—easy 8-to-the-inch cross-stitch.

A little girl could embroider these! Pattern C7113; transfer 7 motifs 5½ x 8 to 5½ x 8½ inches.

### Fielding Stance Important

Sprinters spend hours working on their start and starting position. Yet one of the most overlooked parts of fielding in baseball is the stance, and it is just as important to the fielder as proper starting position is to the sprinter.

Watch almost any amateur ball game, and you'll probably notice that only one player in 50 regularly assumes a correct, ready-for-action stance. Major league baseball players pay very careful attention to their stance. They know that if they are off balance, or in poor position, they won't be able to get underway fast enough to make their play.

The stance is the start of any move a fielder makes. In addition, psychology teaches us that the person who takes a proper stance will have better concentration on what he is doing, and will be more alert and generally in position to be 100 per cent. efficient.

Check this phase of your game. It

can make a big difference. Here is the technique of proper fielding stance.

The feet should be comfortably apart, about as far as the distance between your elbow and your fingers. The knees should be bent slightly, with the weight on the balls of the feet (not the toes). The hands rest comfortably on the knees, and every muscle in the body is as relaxed as possible. Concentrate on keeping every muscle loose; a relaxed muscle will work much faster and more efficiently than a tense one.

Be very careful that you have an equal amount of weight on each foot. If you have too much weight on one foot, you will be able to move quickly in only one direction. Above all, avoid tension, the greatest enemy of athletic efficiency.

This is the type fielding stance used by most big leaguers. Remember, the faster you can start, the more ground you can cover.

#### Answer To Last Week's Puzzle

## Find Dutch Immigrants Happy Here

TORONTO. — A kind of religious truant officer is going back to Holland happy over his visit to Canada.

Rev. W. J. Schouten came here to find out two things: are the 55,000 Dutch immigrants happy in Canada? and are they still going to church? He is going home satisfied on both counts.

Asked concerning his findings, he smiled and said:

"My people, now your people, are happy. They tell me they would never return to the country of their birth, despite the fact that they still love it."

As each of the new settlers landed in Canada he was handed a Dutch-English copy of the Bible, from the reform Church of America.

## Penitentiary Guard Has "Record"

PRINCE ALBERT, Sask. — Equipped with one of the longest "records" in western Canada, prison guard Robert Campbell Wilson has retired from his duties at the penitentiary here.

Mr. Campbell is retiring at 65 after 37 years service that started at Edmonton in 1914 before the penitentiary was moved here in 1920.

"There's been a wonderful change in the system," says Mr. Campbell. "The prisoners haven't the dislike for the guards that they used to have. They have a real chance now."

But the veteran of five or six prison breaks is planning to say goodbye to that with trips planned to visit his four daughters and a son, all married.

## Canadian Fashion

## Hard And Good Times Are Best For Human Race

ATLANTIC CITY, N.J.—Tired of trouble? Wish you could find a paradise?

Well, paradise might be a dandy thing for you personally, but tough on the future of the human race, a medical exhibit at the American Medical Association's 100th annual meeting shows.

Ups and downs, hard times and good times, are apparently a good thing for the human race, said Drs. R. R. Spencer and M. B. Melroy of the National Cancer Institute, Bethesda, Md.

Dr. Spencer told of little one-celled animals, Paramecia, that won paradise. Paradise was plenty of food, a fine temperature, no enemies, everything that science thinks a Paramecium would love.

In eight years, the whole population of Paramecia died out. This happened to six different strains of them. But Paramecia that lived under normal troubles and windfalls are going strong, maybe because changes and challenges "keep them on their toes," Dr. Spencer said.

In another experiment, bacteria were exposed continuously to a temperature of 125 degrees, or enough to be slightly lethal. In three days all of them were dead.

But bacteria exposed to hot temperature, then normal, then hot, then normal, kept on thriving. Great numbers of individuals died, but the colony went on. They adapted, to change. They became able to live under the higher temperatures.

"As individuals, we yearn for peace, stability, security," Dr. Spencer said. "But nature seems to imply that all that may not be good for the race. The conditions that are perfect for one individual are not perfect for the race."

"Individuals are nature's most expendable commodity. Nature cares more about the race than the individual."

## Helpful Hints

Don't forget to remove all rings from the fingers when running the hands into the stockings. The rings are almost sure to catch threads.

To remove an obstinate cork dip a piece of woolen cloth into boiling water and wrap tightly about the neck of the bottle. In a few minutes the cork can be removed.

The taste of castor oil can be disguised by first putting a small amount of orange juice into a glass, then the oil; add more orange juice, and finish by stirring in a pinch of soda. Drink while it is effervescent.

## TRY AND STOP ME!

By BENNETT CERF

A countess sued a man for defamation of character because he had called her a pig. The man was fined, and afterward he asked the judge, "You mean I can never call the countess a pig again?" "That's right," was the reply. "Well," said the defendant, "is it all right if I call a pig a countess?" "That you can do," replied the judge.

The defendant then turned toward the witness box, looked her right in the eye, and said, "Good afternoon, countess."

Psychiatric story Number 7069: A new patient dove on to an analyst's couch, whipped a cigarette out of his case, broke it in half, and stuffed the tobacco into his nostrils. "It's obvious that you need my help," sympathized the analyst. "You bet I do," agreed the patient. "Got a match?"

## New Political Party Seen For B.C.

VICTORIA, B.C.—Possibility that a new British Columbia political party will contest the vacant Esquimalt riding when a by-election is held there was reported from two fronts.

George E. Bonner, prominent Liberal, said he had asked W. A. C. Bennett to form an independent party which would run its first candidate in the Esquimalt by-election.

M. Bennett split with B.C.'s coalition of Liberals and Progressive Conservatives at the last session of the legislature and now stands as an independent representing south Okanagan.

In Kelowna, Mr. Bennett said: "The question of an independent people's party based on genuine free enterprise in favor of social reform is under consideration at the present time."

## : Selected Recipes :

Ham Mousse, decorated with asparagus spears, lettuce, olives and radishes, makes fine refreshing fare for springtime entertaining.

THERE'S nothing like a salad to spices give an added zest and refresh one on these spring days; and here we have a recipe for Ham Mousse, combined with lettuce, tender asparagus, parsley and olives, and complemented with tiny sandwiches and your own pickled peaches—good fare for a luncheon or party snack.

What's a mousse anyhow? Well—it's a mixture of whipped cream, gelatin, and either chicken, fish, sweetbreads or ham, if it's to be served as a main course, or chocolate, coffee or fruit if it's to be a dessert. The mixture is chilled and has a moss-like texture—tasty as a salad and different as a dessert! This particular recipe uses up that left-over ham, too, and the

### Ham Mousse

Two cups ground cooked ham, 1 tbsp. gelatin, 2 tbsp. cold water, 1/2 cup hot bouillon or water, 1 tsp. prepared mustard, 1/2 tsp. paprika, few grains cayenne pepper, 1/2 cup heavy cream.

Put ham through food chopper using fine knife. Soften gelatin in cold water and dissolve in hot bouillon or water. Add to ham and season with mustard, paprika and cayenne pepper. Let stand until cold and fold in cream which has been whipped until stiff. Turn into greased moulds and chill until set. Unmould and garnish with cooked asparagus, radishes and olives. Serve with mayonnaise.

## Airborne Incubators For Premature Babies

VANCOUVER.—Seventeen months ago, St. Paul's hospital here instituted a "flying incubator" service to carry on for storks with a faulty time sense.

Until that time, babes born prematurely in remote regions of the province had little chance of survival. Incubators, oxygen supplies, skilled hospital personnel were all at least 24 hours away.

Since then, a total of 40 babies have been rushed in the incubator by ambulance or airplane from points in the interior and Fraser valley to the ultra-modern clinic at St. Paul's. Teams of special nurses are available day and night to go to the aid of the mites and bring them back to the clinic.

The nurses take a portable incubator, oxygen tanks, hot water bottles and stimulants so that the babies can have the best possible care en route.

So far, nine babies have been flown to the clinic and 31 have been rushed by ambulance. Another 40 have been admitted from the Vancouver area.

Of the total of 80, 46 have survived. Most of those who died, lost their lives through other factors and complications which make the odds too great.

But specialists say the mortality rate would doubtless be higher without the special clinic and portable incubator service—especially in the out-of-town "preemies".

And the specialists feel the mortality rate will drop still lower. They have started a long-range research and check-up program to develop new and better techniques.

### DAY BEFORE VACATION

Happy feet dance on to school down along the gravelled walk, Picking here and there a posie, pausing too to laugh and talk. Every heart is light and gay; every child is eager too.

Lessons are not burdensome. Hours speed quickly by; 'tis true!

Teacher hears no dismal murmurs; hears no grumbling all the day. She is happy with the children; joins them in their work and play. Surely there must be a reason—tell me now and set me right—Why these children are so merry; are so well behaved and bright?

Oh, I know now! and in the knowing have a secret I must tell: 'Tis the day before vacation when no more will ring the bell.

For two months they will have freedom from their teacher's books and rules.

So today they are examples of bright pupils in our schools!

## Allergic To Dishwater

WINNSBORO, Tex.—M. L. Waggoner is developing a high degree of chivalry—and ingenuity—these days.

Mrs. Waggoner has discovered the cause of an irritating rash which bothered her for a long time. She's allergic to dishwater. Her doctor confirms it.

As to the man of the house: Waggoner is now washing dishes. But he's also buying paper plates—in two-dozen lots.

## SMILE OF THE WEEK

NO SYMPATHY  
"I want to tell you, sir, that I'm engaged to your daughter."

"Well, dash it all—don't come to me for sympathy. What else did you expect after hanging round the house every night for months?"

### ANSWERS TO QUICK QUIZ

ANSWERS: 5. Wage rates have more than doubled. 3. 1871. 1. Middle Island in Lake Erie. 4. 160,000. 2. By 1954.

(Material supplied by the editors of Quick Canadian Facts, the handbook of facts about Canada.)

The poppy has been known since five or six thousand years before the birth of Christ.

## OUR COMPLETE SHORT STORY—

## THE SENTENCE

"I'll Never Burn!" Was  
Tainter's Repeated Assertion : By JOHN T. KIERAN

"I'll never burn!" was Tainter's repeated assertion, even after they had removed him to cell block K, that island of the condemned set in this sea of humanity's hotness and jetsam. And now his great opportunity had come.

Cell block K was separate from the other cell blocks and situated in the centre of the huge old building that formed part of the prison. Ordinarily the cells in K would have been the last word in inescapable imprisonment, but just as they had been made more cunning-proof than the cells in the other blocks, so were the men confined in them possessed of more cunning and a relentless, desperate sort of courage than the men in the others.

Tainter was one of the condemned. Until the moment of his execution he was to be confined in block K. Burn him! That was what they were going to do. Give him the chair. But they wouldn't! He would never burn. Any chance, any attempt, no matter how desperate would be preferable to waiting here for the time when they would sit him down in that chair. It scared him every time he thought of it. He wasn't a coward. No one who knew him would ever say that. He had faced death too many times in his operations. Maybe it was why he was so successful a killer, his lack of fear. But this! Led like a sheep to be bumped off by a trickle of juice he couldn't even see. No matter what happened he would not be electrocuted.

For a long time the whole prison had been seething with discontent. Crowded quarters, restricted privileges due to lack of facilities, and other less well-founded complaints had made the men rebellious and sullen. And the men in block K, the condemned and the incorrigibles, smouldered with the fires of desperate natures or the fears of what was coming.

Tainter engineered the break from the start. By means of the usual underground telegraph the entire block was in on the plan. Several of the trustees had been enlisted. They were to furnish the revolvers and to aid the men in getting out into the corridors.

Tainter feared only one man. That was Hardy, the head warden. He had such an uncanny way of ferreting out breaks just before they broke. Also there was Father Hazzlet, the prison "sky-pilot". He was always advising against rashness. Nothing but grief could come of it, he always said. In fact he had dissuaded men more than once from making breaks for liberty.

But neither Hardy nor Hazzlet had gotten wind of the break. And it was too late for them to do it now. In a minute it would be in full swing. One of the untrustworthy trustees motioned to Tainter from the corridor, handing him a revolver as he came to the bars.

"Everything O.K. Ladder in the east yard. Here's the match and gas."

Tainter pulled some newspapers from under his mattress, wadded them and poured the gasoline from the small bottle over them and the mattress and lighted the match. In a moment the bunk was in flames.

As the smoke rolled into the corridor pandemonium broke out. The flames licked up the mattress and started on the walls of the flimsy old partition. The acrid smoke made Tainter cough violently.

He had not intended for the fire to gain so much headway. The trusty was to see the smoke and run for one of the "screws" to come and let Tainter out. Then Tainter was to do the rest.

Finally the guard rushed up and unlocked the door. As Tainter bounded out he hit him with the butt of his revolver and took his keys. Swiftly he started to let the others out.

But something now had alarmed the main office. The button there that unlocked or locked the cells by electricity, the same juice that was to have burned him, was touched. Instantly the remaining cells were doubly locked. His keys did no good. He flung them away with a curse. "Come on!" he yelled to the half dozen he had liberated. "We can make it into the yard."

But as they started down the corridor a hail of bullets swept it. The trusty dropped. The others retreated.

In a turn of the corridors they halted. Tainter had his revolver and one of the others had the guard's.

"We've got to make a run for it!" Tainter exclaimed. "Smithy and I will lead. You guys follow."

They made another desperate sally and got half way down the hall to where Hardy and the three guards were barring the way. Smith dropped. Tainter fired three of the six shots in his gun and saw a guard fall. Again they retreated, Tainter the last to turn.

"We've GOT to go through them," he stormed. "In a moment they'll have a dozen guards. We've killed a guard, so we'll all burn if we don't. But I'll never be electrocuted. Come on!"

"Here comes Hazzlet!" one of the men whispered.

And indeed he was walking toward them, partially obscured by the smoke that nearly filled the corridor. Tainter grinned slowly. Just the thing! "We'll use him as a shield to lead us by them!" he announced.

In a moment Father Hazzlet had reached them. "Men, you cannot go on with it."

"Oh can't we?" Tainter mocked. "They can't get back here, either. And unless they do everyone in the building will fry. You are goin' to lead us past them!"

"I will not!"

"Goin' to let five hundred men cook then?"

Hazzlet hesitated. Then looked at the flaming cell that Tainter had fired. The one next to it was burning. The freight elevator behind it was also in flames. Men were pounding on the bars and screaming now in deadly earnest.

"Goin' to let them sizzle? I'm in earnest. I AIN'T goin' to be electrocuted, see!"

Without a word Father Hazzlet started out. But the smoke must have confused the men at the other end. Another hail of bullets swept the corridor. With an oath Tainter turned on Hazzlet and fired. But the others were running ahead now, hands high in surrender. But HE wasn't surrendering. He still had two bullets. A stream of water from a fire hose drenched him suddenly. He fell back. Not out that way. The freight elevator! Dumb not to have thought of it before. Down to the basement, then into the yard.

He sprang into the elevator, gasping from the stench of burning rubber. His wet shoes made contact with the iron floor, and as he touched the iron door which had been electrified by the cage's touching the cables from which his fire had burned the insulation, he stiffened and then crumpled. He had been electrocuted. (Copyright Wheeler Newspaper Syndicate)

## THE TILLERS

**REPRESENTED KING**—Wearing the scarlet tunic of Colonel of the Grenadier Guards, Princess Elizabeth rides side-saddle, her chestnut charger "Winston" as she inspected the troops during the ceremony of Trooping of the Color at Horse Guards Parade, London. Having represented King George who is ill, the Princess, (above), is shown upon her return to Buckingham Palace. She is wearing a tricorn hat which has white plume fixed in a grenade on left side, an exact copy of that worn by a colonel of the regiment in 1745.

## : Western Briefs :

## Good Idea

**MOSSBANK, Sask.** — The safety lane conducted by the highway traffic board visited Mossbank June 15. Over 60 cars were tested for brakes, lights and wheel alignment.

## Air Force Base

**EDMONTON.** — A huge R.C.A.F. supply base for western Canada will

be constructed at Namao air base eight miles north of Edmonton Air Vice-Marshal R. E. McBurney said.

## Struck By Lightning

**JARROW, Alta.** — Gordon Ross Whidden, 27, a farmer, was killed instantly by lightning. He was plowing with his tractor when the bolt struck. Jarrow is about 105 miles east of Edmonton.

## Debt Reduced

**EDMONTON.** — Total funded debt of oil-rich Alberta has dropped below \$100,000,000, K. J. Hawkins, deputy provincial treasurer, announced. Mr. Hawkins said this was achieved by repayment of \$2,696,383 in debentures and interest which came due June 1. This repayment reduced the debt to \$98,356,132.

## Vote On Building Project

**SASKATOON**—Saskatoon will vote July 11 on a bylaw to build 130 housing units here under section 35 of the national housing act.

## Heads Travellers

**PRINCE ALBERT, Sask.** — Cyril Stack, Toronto, was elected president of the dominion council of the Associated Canadian Travellers at the dominion biennial convention at Waskesiu in Prince Albert National Park. Provincial vice-presidents elected included J. F. Meehan, Brandon.

## Want Commandments Posted

**CALGARY.**—The Anglican Synod of Calgary diocese asked the Alberta Education department to post a copy of the 10 commandments in every school in the province. The resolution also asked that the commandments be taught in all schools.

Iowa is named after the Sioux tribe of Ioways or Alakouez, meaning "sleepy ones".

## Lynn Lake Rail Line Approved

**OTTAWA**—The commons gave approval in principle to the Canadian National Railways building a 155-mile rail line to tap nickel-copper ore deposits at Lynn Lake, Man. The house gave second reading to a bill authorizing the new line.

The \$14,725,000 line will run from Sherridon, Man., to Lynn Lake, where the Sherritt-Gordon mining company is to locate its operations now centred at Sherridon, where ore deposits have become exhausted.

The C.N.R. is to bear \$100,000,000 of the construction costs, with the federal government putting up the remainder as a measure to assist defence production because of the strategic minerals involved.

Transport Minister Chevrier said that under an agreement between the C.N.R. and Sherritt-Gordon, the railway is to be completed by Nov. 1, 1953. The company is to build a plant to produce 2,000 tons of ore concentrates a day at Lynn Lake and a plant at Edmonton to refine the ores by use of natural gas.

## Fashions

## Everything's Easy

by Anne Adams

Just about the simplest sewing! Add this smooth beauty to your collection of summer coolers. Colorful embroidery for scoop neckline, shoulders, smart pockets is a fashion first! Transfer included!

Pattern 4965 in sizes 12, 14, 16, 18, 20. Size 16 takes 3 3/4 yards 39-inch fabric.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

## Fish & Game Elections

The Carbon Fish and Game Association held its annual election of officers at a meeting held at the Alberta Pacific elevator office Wednesday, June 20. The following slate of officers will head the organization for the ensuing year:

President, Claude Cressman.  
Vice pres., Gideon Schell.  
Secretary - treasurer, Francis Poxon.

Executive committee: Gottlieb Eslinger, Ted Schmidt, Leo Ohlhauser, John Reid, Dave Gieck, Gottlieb Schell, Leo Ohlhauser.

Membership committee: John Reid, Ted Schmidt, Wray Wright and Gottlieb Schell.

The association was reported as being in good financial condition. Membership fees were again set at \$2.50.

Indications are that the pheasants released in the district last year weathered the severe winter in good condition. Feeding of the birds during the winter is believed to be largely responsible for their survival and the association extends its thanks to all who donated feed for this purpose. Further stocking of the district may be done and all who care to join the association would thus help defray expenses of such a program.

FOUND—On Sports Day, 1 Rubber Boot; Bathing Trunks and towel. Apply at Carbon Chronicle office.

FOUND — Lady's Wrist Watch. Apply to Ben Schuler.

LOST—Anyone finding two pair of scissors near the sports day parade starting point please return to Mrs. S. J. Garrett.

Rev. and Mrs. G. B. Hotchkiss were welcomed to the Carbon community Monday at a party held in the Anglican church basement. Whist and bridge were enjoyed and Hugh Isaac conducted a musical quiz. Bridge prize winners were Claude Cressman and Mrs. Morris Switzer, while Mrs. F. Heath and Mrs. E. Maxwell won whist prizes. Mrs. J. A. Barr took top honors in the musical quiz.

Mr. John Atkinson introduced Rev. Hotchkiss to the gathering, and following a few words from the guests of-honor a delicious lunch was served.

## Letter To The Editor

Dear Sir,

The Lions Club should be commended on the wonderful job they did of organizing the parade and other events on sports day.

There was a lot of time and effort spent in decorating the cars. Surely one of them should have been entitled to lead the parade if a car was to take that position.

People would have appreciated seeing some well respected citizen who is a good supporter of the town. Instead they were sadly disappointed.

World War II Veteran who served for 6 years for better leaders.

# • Attention GARAGES & SERVICE STATIONS

In accordance with the Vehicles and Highway Traffic Act, passenger cars and motorcycles will be tested and approved before being permitted the use of the highways. Therefore:

**YOU ARE INVITED TO APPLY FOR AN APPOINTMENT AS AN AUTHORIZED TESTING STATION**

It is not necessary that special equipment be employed, but it is most important that responsible persons in each testing station be satisfied beyond any reasonable doubt as to the safe condition of the mechanism and equipment tested, before affixing the sticker and issuing the certificate of approval to the owner. The maximum fee chargeable by a testing station has been set at \$1.00. The fee is payable by the owner of the motor vehicle and does not include any charges for repairs and adjustments required. The following is a synopsis of the mechanism and equipment to be checked.

### BRAKES—

- (a) Check stopping distance
- (b) Examine lines and cylinders for leaks (visual)
- (c) Examine rods and clevis pins for wear

### LIGHTS—

- (a) Check headlamps for proper aiming and distribution of light
- (b) Tail and stoplamps must work and show a red light to the rear
- (c) All lighting equipment on car must work

### MIRROR—

- (a) Check mirror for proper mounting and clear vision

### WINDSHIELD WIPERS—

- (a) Windshield wipers must work properly and clean windshield for clear vision.

### HORN—

- (a) Horn must be audible for at least 200 feet

### STEERING AND WHEELS—

- (a) Check steering assembly for wear and excessive play
